Diameter Multiplexer (MUX) Configuration

Table of Contents

MUX requires three configuration files:

jboss-service.xml

This file is specific to SAR. Please refer to the ` manual for explanation. The file binds Diameter MUX under the following JMX object name by default: `diameter.mobicents:service=DiameterStackMultiplexer`.

jdiameter-config.xml

This file configures the stack exposed by MUX. Please refer to [_jdiameter_configuration] for details. It is located in *mobicents-diameter-mux-.sar/config*.

dictionary.xml

This file configures the dictionary. Its structure and content is identical to the file described in [_jdiameter_validator_configuration].
